

All My Papers Announces Native Support for Panini Scanners in All My Checks Software

Panini Scanners provide superior performance for check scanning and ICL creation

Katy, TX – August 6, 2019 – All My Papers, a developer and distributor of platform solutions for Image Cash Letter (ICL) file processing and standards conformance announced it has integrated direct scanning support of the Panini scanners into the All My Checks software application.

All My Checks software supports the ml:Deal and EverneXt scanners. The Panini scanners enable API-free connectivity for check capture directly into the All My Checks application to create check image cash letter files (ICL/X9/UCD) for Remote Deposit (RDC).

“All My Papers is a leader in Image Cash Letter creation and processing, and we are pleased that they chose Panini to be their first integrated scanner.” Stated Francesco Grasso, Corporate Marketing Manager, Panini.

“Panini scanners expand our installations with minimal integration due to the API-free interface,” said Tony Fera, CEO of All My Papers. “All My Checks™ automatically processes scanned documents and extracts check images and MICR information. The check images are processed to conform to exchange standards and the Panini scanners provide quality images as an input into the platform.”

All My Papers products are trusted by hundreds of financial institutions, software companies and state and federal agencies in production environments for:

- Image Cash Letter Files – Creating, viewing, analyzing, printing, extracting and correcting X9.100.187 and variant cash letter files
- Remote Deposit Capture – Create Forward and Return Cash Letter Files
- Items Processing, Returns Processing and Exception Payment Processing
