# X9 RPC

The X9 Remote Payments Consolidator (X9 RPC) is built on theX9 Image Clearing Capture System for organizations to capture check images remotely and then process & prepare check image clearing files compatible with variety of exchanges or financial institutions.

X9 RPC

X9 RPC Data Flow

The X9 RPC application is built on the All My Papers X9 Image Clearing Capture System and facilitates remote capture of check images for imncorporation into ICL files compatible with a variety of exchanges or financial institutions.

The platform uses standard non-proprietary SQL Database and X9.100-187 file formats to enable remote check image capture from these devices:

- Check scanners
- Mobile devices such as smartphones
- Desktop and sheet fed scanners
- Multi-function devices

X9 RPC also provides:

- Duplicate Detection
- Image Quality Assurance
- Data extraction - MICR and dollar amounts
- Automatic MICR Repair
- Exception processing
- Reconciliation of items sent and received and dollars

X9 RPC can produce ICL files compatible with most exchanges and over 50 bank RDC formats

X9 RCP provides additional interfaces to:

- Image archive systems
- Accounting systems

Standard reports package includes

- Items Sent and received
- Office statistics
- Custom report developemnt available

Return item processing via All My Papers' X9 Returns product

X9 RPC Benefits

- Accelerated check clearings

- Improved cash availability

- Enhanced Cash Flow

- Reduce return Item risk

- Reduce processing costs

X9 RPC Functions

- Any scanner is a check scanner

- Image Quality Assurance

- Accurate MICR and dollar data extraction

- ICL files formatted for over 50 banks and exchanges
